

Meeting Agenda - 16th April

Location: Library

Date: 16th April

Time: 10:30

Facilitator: Florian

Secretary: *Barnabas*

Participants: Barnabas, David, Florian, Julia

1. Objectives

MVC - Connecting everything together, how, why?

2. Reports

DB is rewritten. Filechooser is under construction, almost done. Search and tagcloud almost done, just need to write controllers to update the view. A first running version of the Map. GUI is briefly connected to the Model.

3. Discussion items

1. How do we do...?

See reports.

2. What to do...?

The plan for THIS and next week is to:

- Get started with the SDD
- Flow diagram (push to repository)
- **JUnit - start writing test classes**
- Database should be finished soon
- Implement the map
- Look up how to scale picture.
- FileChooser (image import)
- Start wiring everything together, map, tagcloud, search.
- Plugins?
- An idea, javadoc?

Our next running version should have:

Fully functional search, tagcloud, filechooser, (scale pictures).

4. Outcomes and assignments for us this and coming weeks.

- Julia should.... work with the file chooser, DB, calender.
- Barnabas should... work with checking MCV, HMVC, fully implement the search and tagcloud.
- David should... work with the display of images and scale them.
- Florian should... work with implementing a fully working version of the map.

5. Wrap up

Next meeting Thursday 18th April
