Meeting Agenda - 16th May

Location: Kemigården
Date: 16th May
Time: 13:19
Facilitator: Florian
Secretary: *Barnabas*
Participants: Barnabas, David, Florian, Julia

1. Objectives
Add missing functions and write test classes. Clean code. Same as before as we are in the finishing stages.

2. Reports
Fixed some more bugs. Reverse-Geocoding works (not implemented yet). We are also working on fixing interfaces to the database. This way the underlying layer can be changed without loosing compatibility with our plugins.

3. Discussion items

1.   How do we do...?
Cleaning up. See reports too.

2.   What to do...?
The plan for THIS week is to:
● Test-classes, seriously!
● Fix Plugins
● Discuss some design patterns.
● Continue writing the SDD (mainly UML)
● Flow diagram
● Update the design model, as a lot has changed since the start of the project.
● UML

Our next running version should have:
        Everything we set up

4. Outcomes and assignments for us this and coming weeks.
● Julia should.... Rfineing the database code, working on displaying and editing of tags, locations, comments etc.
● Barnabas should... Work with the plugin system, infer some generic interfaces to the database.
● David should... work with the display of images, all images should be displayed in the same size. Add MouseListeners to display a single picture on click. Write tests classes.
● Florian should... work with refactoring, running findbugs and PMD.

4. Wrap up
        Next meeting May is on 17th May, Thursday.
