1. Objectives
Nothing special.

2. Reports
DB is rewritten. Started implementing the search function, tag clouds and map. GUI is briefly connected to the GUI.

3. Discussion items

1.   How do we do...?
We have rewritten the database
Worked on a XMLParser (extracts certain info from XML)
GUI
Planning and structuring

2.   What to do...?

The plan for THIS and next week is to:
- o   Get started with the SDD
- o   Finish RAD
- o   Domain Model
- o   Use cases + flow diagram (push to repository)
- o   JUnit - start writing test classes
- o   Database should be finished soon
- o   Implement the map
- o   Look up HOW to show pictures (canvas/layouts) and scale them (Graphics 2D)
- o   FileChooser (image import)

4. Outcomes and assignments for us this and coming weeks
- Julia should.... work with the file chooser
- Barnabas should... work with the search
- David should... work with the display of images (canvas/layouts etc)
- Florian should... work with implementing a fully working version of the map.

5. Wrap up
   Next meeting is tomorrow.
